EXPERIENCE

Frontend Engineer

Doran Jones Inc. (Citigroup)

JAN 2022 - current

Tampa, FL

- Integrated with a multinational team of 170+ engineers to support the development of a catalog of financial risk and compliance management tools.
- Applied frontend development best practices in order to create and implement UI features in legacy codebases as well as greenfield projects.
- Played a key role in the conversion of testing frameworks from Jasmine to Jest in a 560+ component project, significantly increasing code coverage and testing speed.
- Onboarded and mentored junior developers, teaching the fundamentals of frontend development in Angular.

Revenue Operations Manager

Avocat Group

SEP 2020 - SEP 2021

Tampa, FL

- Facilitated the process for CRM data consolidation and integration into new systems (Zoho, Outreach, ZoomInfo, Affinity).
- Analyzed and interpreted market data and territory research to deliver top-funnel opportunities to SDRs and AMs.
- Created account-based marketing content, email sequences, and targeted email strategies.

Account Executive

First Coast News - Tegna Inc.

JAN 2020 - SEP 2020

Jacksonville, FL

- Identified and developed new local accounts through prospecting, media spend research, campaign ideation, and presentations.
- Conveyed value to clients and prospective clients regarding a wide selection of traditional media, sponsorship, digital, and proprietary OTT products.
- Built presentations, campaign materials, and programming schedules to increase cost-efficiency and reach/frequency for existing strategies.

National Sales Assistant

First Coast News - Tegna Inc.

AUG 2019 - DEC 2019

Jacksonville, FL

- Collaborated with third-party selling platforms to manage transactional business in broadcast programming.
- Networked with core account representatives and agencies to ensure timely and accurate delivery of traffic instructions and creative content.

EDUCATION

University of Florida

B.S. Telecommunications Management

AUG 2015 - MAY 2019

Gainesville, FL

PROFILE

I am a frontend developer specializing in the MERN stack, but working with Angular on a day-to-day basis. I'm passionate about building robust, engaging web applications to support dynamic content and actionable user experiences.

TECH STACK

Javascript ES6+ | TypeScript

HTML5 | CSS3 | SCSS

Node.js | Express

NoSQL (MongoDB)

React | Next.js | Angular

Webpack | Babel | Rollup

GCP | AWS | Firebase | Netlify | Heroku

SKILLS

Translating user stories and design mockups into performant UI components.

Understanding unique-selling-propositions and tailoring end-user experiences to support revenue objectives.

Identifying and utilizing resources in order to self-learn and adapt to new frameworks and technologies.

RECENT PROJECTS

Kadoodle

kadoodle.us

Multiplayer drawing and guessing game. Supports group video chat.

Chatmosphere

chatmosphere.us

Instant messaging platform providing lightning-fast communication for family and friends.

Chord Finder

chordfinder.us

Enter notes on a virtual fretboard and learn what chord you're playing.

MovieWorm

movieworm.io

Full-stack progressive web app for creating private groups, inviting friends, and sharing movie reviews + ratings.
